1905 — Celebrating the Half Century Mark — 1955

TO OUR FRIENDS AND CUSTOMERS:

To you, whose patronage and good will have made this Anniversary possible, we present our 1955 catalog — marking our FIFTIETH YEAR in business.

In 1905, our Founder, GEORGE A. BURNETT, started in a small store at 101 West St., which in those days was a very busy retail section of downtown Manhattan. At first the young enterprise depended entirely on the active transient trade of Jersey commuters using the ferries, and uptown home owners in the Bronx and Riverdale, which was really out in the country at that time.

Gradually, as he was able to afford more help, the Founder had time to travel the eastern part of the country on foot and by horse and buggy, calling on the large, private estates of that early era. His integrity, horticultural knowledge, and reputation for supplying seeds, bulbs, and plants of superior quality, quickly established a discriminating clientele. The business rapidly outgrew its quarters and repeated moves were necessary to provide space for the expanding trade. The final move to our present location was made in 1918, and the Firm was incorporated in 1925.

Our motto, "*Reliable Seeds and Prompt Service*," conveys the aims of the management. The seeds, bulbs, plants and horticultural supplies offered are the very best obtainable and every effort is made to meet the individual requirements of the customer. The men and women on the Staff have been with the Firm for many years and are practical horticulturists, equipped to give sound advice to gardeners and flower lovers. We are represented by traveling men with a complete horticultural background who are available and anxious to serve you at all times.

We take this opportunity to thank you for your confidence in our merchandise and pledge that we will strive to maintain the standards laid down by our Founder in the years to come. This 50th Anniversary catalog is also a tribute to our entire personnel for their constant and faithful service.

Sincerely yours,

JANUARY, 1955

The Satisfaction of a Perfect Lawn

A fine lawn is obtained by the careful and exact fulfillment of three fundamental requirements. Careful preparation of the seed bed, the use of good grass seed and the proper maintenance of the turf once established. These three factors are of equal importance, and failure to meet any one of these requirements will make the efforts expended of little avail. **Burnett Bros. Inc.**, with a reputation of supplying grass seeds of the highest quality for a period of 50 years, assume the responsibility of guaranteeing good seed.

Such lawn grasses as **Redtop** and **Bents** which are subject to the ravages of the Chinch Bug are not included in this mixture.

Shady Place Lawn Seed Mixture

Shady Place is a well balanced mixture of Fescue, Poa Trivialis, Kentucky Blue and Red Top. This formula makes it perfectly adaptable to fully or partly shaded areas. Soil under trees is in most cases impoverished and grass roots have to compete for food with the tree roots themselves. It is therefore wise to fertilize liberally in early Spring and early Fall to keep the turf growing and in good condition. If the soil is found to be too acid through lack of sunlight and dampness, add lime and loosen the soil well before seeding. Our "Shady Place" formula contains 65% Permanent Lawn Grasses. Lb. \$1.75, 2½ lbs. \$4.25, 5 lbs. \$8.25, 12½ lbs. \$19.75, 25 lbs. \$38.50, 50 lbs. \$73.50.

STRAWBERRY PLANTS—**POT GROWN**

Strawberry Plants are not difficult to grow and readily adapt themselves to a great variety of soils and climates. Pot-grown plants can be set out in the field at any time during the Spring or late Summer and early Fall months, as their strong, fibrous roots take hold quickly in new location, and can be depended upon to produce bigger crops of larger berries than field-grown layer plants.

A careful selection of varieties will insure fresh berries in the garden from early June until late Fall. This can be accomplished by choosing an **early**, a **midseason** and a **late** fruiting type as

indicated in description of varieties listed below. We recommend planting no less than 25 plants of a variety as we know from experience that growing fewer plants does not give a satisfactory picking for a small family. **Book your order NOW.**

SHIPPING SEASONS—April 1st to May 15th and August 1st to October 15th.

NOTE—Our plants are taken from growing frames, knocked out of pots, individually wrapped, packed in wooden boxes, and shipped by express. (Although not recommended, small lots can be shipped Parcel Post if necessary.)

STRAWBERRY CULTURE

PREPARATION OF SOIL: Dig bed for your plants to a depth of 14 inches and incorporate well rotted manure (not fresh manure) or decomposed leaves with the soil. Afterwards scatter Bonemeal on each bed, raking it well into the surface.

PLANTING INSTRUCTIONS: When plants arrive, unpack at once and place in a shady spot, sprinkling them lightly with water. After hot sun has gone down in early evening, dip each root ball in a pail of water and loosen the soil with the fingers. Be careful not to knock soil from the roots. When planting, set the plants 1 foot apart in the row, spacing the rows 2 feet apart. Plants need a minimum of 6 hours sun a day so do not plant in very shaded location.

RULES FOR SUCCESS: Most important rule is to keep weeds down by cultivating which will also loosen the soil, preserve moisture and induce healthy growth. If good, clean salt hay is available it is advisable to mulch the entire bed about the time green berries are forming, working hay well under the leaves. This practice keeps down weeds during the fruiting season, keeps berries clean and free from rot and preserves soil moisture. In early Winter mulch the beds with a light covering of coarse manure, evergreen boughs, salt hay or similar material.

Giant Single Asters—Artistic and Graceful Cutflowers

BURNETT'S BEAUTIFUL ASTERS

The introduction of a Wilt-resistant strain of Asters of recent years has helped tremendously in restoring this beautiful flower to popular favor as a garden plant. Up until the time of the origination of this resistant strain, garden enthusiasts were becoming discouraged trying to grow Asters outdoors with the wilt-disease so prevalent. The appearance of this new strain has again awakened interest in the culture of Asters.

For best results the ground cannot be too richly prepared. Plants from seed sown in the open ground in May will bloom in September and October. For July and August flowers, sow in March or April in cold frames or hotbeds. We especially recommend the following as being the best for cutting and general garden use.

New! BURNETT'S PERENNIALS Versatile

OUR OWN INTRODUCTIONS and SELECTED FAVORITES

Our perennial plants are all strong, field-grown or potted stock. They are **vigorous, young plants** that will readily establish themselves permanently in your garden. Do not buy perennial plants by size alone. Large, old clumps are never satisfactory and will soon die out when transplanted. **Plants are not sold in any quantities less than those priced.** 5 plants of any one variety are sold at the 10 rate. Take advantage of this saving over the smaller quantities.

Cultural Hints—Never plant Hardy Perennials too deep, and as a rule they prefer a well-drained, loamy soil that is neutral or slightly alkaline. Poor soil should be well prepared beforehand by digging in well-rotted manure with bonemeal added if possible. When fertilizing make sure no commercial fertilizers ever come in direct contact with plant as this will burn young roots and lower foliage. Keep weeds down and soil loose around plants by frequent cultivation.
